

## Radiator Cleaner

- Designed to clean and maintain water systems on motorcycles
- Cleans the entire coolant system by dissolving and combining residues such as oil and grease
- Dislodges and removes sludge, lime and corrosion deposits, thus ensuring optimum engine cooling and reliability

Description	Contents ml	Art. No.	Pack Qty.
can	100	<b>5001 26</b>	1

## Engine Oil Additive

- Specially formulated for motorcycle engines as a friction reducer and oil revitaliser
- Reduces friction and wear on components whilst it helps maintain a clean oil system by reducing carbon build up and sludge
- Only ever top up the existing oil with a maximum of 10% oil additive to oil
- Suitable for all mineral and synthetic based oil systems

Description	Contents ml	Art. No.	Pack Qty.
can	150	<b>5001 27</b>	1

## Engine Flush and Cleaner

- Specially formulated for motorcycle engines and will not harm motorcycle clutch plates during its cleaning process
- Removes carbon deposits and sludge
- Keeps oil seals clean and effective for longer

Description	Contents ml	Art. No.	Pack Qty.
can	300	<b>5001 25</b>	1
